EXPERIENCE

Crowdr, Lagos

Frontend Engineer

March 2023 – Present

- Set up responsive and accessible dashboard layout from ground up including page overlay and routing system, laying groundwork for all further development effort
- Built 30+ highly-functional, typed, reusable components utilised throughout the app speeding development time by over 70% and ensuring overall application consistency
- Built versatile reusable and accessible form components with built-in validation. For example, drag-and-up-enabled file picker with client-side image compression and preview capability, multi-format date picker, etc.
- Improved user experience by adding loading states including skeleton loading to relevant parts of the app as well as introducing key optimizations increasing performance by over 50%
- Established systems, standards and best practices to guarantee application maintainability and scalability

Environment: Next.js, TypeScript, Tailwind CSS, Jotai, Flowbite, Git

Technocrat IT & Consult, Birmingham

Web & Mobile Developer

March 2023 – Present

- Worked on SFA app sales module rewriting convoluted sales and promotion application business logic improving scalability and maintainability as well as spotting and fixing critical implementation bugs and implementing new features
- Wrote IndexDB-based offline mode for entire app allowing operation in bad or no network conditions
- Built configurable, observable-based automatic offline syncing and data reconciliation system ensuring local and server data are kept in sync
- Built admin dashboard schedule tracking module with advanced filtering for querying and presenting sales rep schedule data on a calendar and table interface
- Functioned as team lead coordinating and leading development effort and also mentored interns

Environment: Angular, Ionic, TypeScript, Bootstrap, SCSS, Git

SKILLS

TypeScript
JavaScript
React
Vue
Angular
Next.js
Nuxt
Ionic
NodeJS
Express
MongoDB
Git
Bash
Firebase
Docker
Tailwind CSS
Chakra UI
Material UI
Styled Components
Sass
Jest

EDUCATION

University of Benin

Bachelor of Science, Computer Science

December 2022

Benin-City, Edo
